Medical Group Management Association Utah

Who is MGMA Utah?

The MGMA of Utah is an organization of medical group practice managers whose mission it is to enhance the knowledge and skills of its members by providing forums for the exchange of ideas and by offering educational programs geared to medical group management.

Members of MGMA Utah work to achieve a higher quality of medical care in Utah and strive to better serve the physicians who entrust us with the responsibility for their practice. We do this through:

- Regular meetings between members to provide networking opportunities and question-and answer discussions
- Annual conferences to learn from each other and from qualified professionals who are experts in medical group management
- Involvement on committees which explore the various aspects of our business, e.g. legislation, Medicare, UHIN, third-party payers, etc.

Member Benefits

MGMA Utah is an association dedicated to providing for the success of its members and presenting an excellent place for education, communication and networking among other professionals.

Networking. MGMA Utah offers at least four regional meetings a year in which association members can meet with other medical group managers, ask questions about problems they are trying to solve and simply get to know others in the same field of work. With such a network in place members can e-mail or phone other members about specific needs which may arise later.

Communication. MGMA Utah provides access to information and individuals which will help you deal with the breadth and depth of the responsibilities you have.

Education. In addition to educational speakers at our luncheons, MGMA Utah offers a two day annual conference each spring and a one day conference in the fall with well-qualified, professional speakers and educational programs for MGMA Utah members. MGMA Utah members can also advance their careers through the American College of Medical Practice Executives (ACMPE).

Salary Survey. MGMA Utah offers a salary and wage analysis through the National MGMA organization, covering most job positions within the medical office. The Salary Survey is a valuable benchmarking tool for medical professionals. The survey results are sent free to all participants.

Physician Benefits

Membership in MGMA Utah benefits not only the medical practice manager but the Physician and the practice as a whole.

Stay Up To Date MGMA Utah strives to keep its members abreast of the changes in the medical community. Legislative issues, coding compliance, and changes in federal and local regulations are just some of the issues closely watched by MGMA Utah and MGMA National.

Employee and Patient Satisfaction MGMA Utah knows that physicians work hard to serve the needs of their patients. We support the physician by educating the practice manager about additional ways to run an efficient office. MGMA Utah members are instructed by professionals and their colleagues in key management issues relating to employee and patient satisfaction.

Informed Decision Making Managers are provided with local and regional resources through MGMA Utah membership that will enable the physicians and medical groups to make educated decisions about their practice's future and investments.

Cost Savings Membership in MGMA Utah is a small investment for a more successful practice. MGMA Utah provides beneficial conferences and seminars at a very affordable price. Invest in your practice today! **Encourage your practice manager to join MGMA Utah!**
